

The **HOTSHOT™** : Self Defense System

The patent-pending HotShot™ system is a compact, powerful, safe and effective personal defense product that blasts about 5 grams of HOT pepper powder onto your attacker. HotShot™ is the only self-defense product available today that creates an instant barrier between you and your attacker. The HotShot™ can be easily concealed and carried, such as in a pocket, by law enforcement, corrections, military, private security or bail enforcement agents.

The HotShot™ is a self-contained and integrated solution that has reloadable cartridges that release clouds of hot pepper powder (red) or training inert powder (blue).

The HotShot™

Physical and Operational Specifications

PHYSICAL

Launcher with Cartridge

Size: 1"x 6"
Weight: 3.4 oz.
Material composition: Rugged polymer and aluminum construction that is impact and water resistant

Cartridges (Disposable)

Blue disposable practice cartridges consist of a chamber that is loaded with scented baby powder (5 grams)
Red hot pepper powder (PAVA) cartridges consist of a chamber that is loaded with super hot capsaicin II pepper powder (5 grams)

FEATURES:

- Compact and highly portable defense (weighs only 3.4 ounces).
- Launches hot pepper powder in a cloud onto an attacker and also creates a barrier between you and your attacker.
- Pepper cloud irritates attackers eyes, nose, and lungs causing temporary incapacitation.

OPERATIONAL

Safety

Ambidextrous, one finger operation to take safety OFF.

Reload

Quickly reload hot pepper powder (red) or inert training cartridges (blue).

Target Range

Up to 12 feet depending on weather conditions (wind, rain, etc.) (not recommended for less than arm's length)

CO₂

Powers launcher and is contained within disposable cartridges. Temperature range 34° F - 120° F
