

# PepperBall® Custom Carbine Launcher™:

# Customized for Duty

Customized for use in demanding law enforcement deployment, and built to last for enduring service, the Custom Carbine meets exacting standards for less-lethal use of force. This semi-automatic PepperBall® launcher is target accurate at 60 feet, and can create a cloud of pepper powder up to 150 feet away. The highly versatile Custom Carbine can launch live pepper, inert training, glass breaking, water, or marking projectiles. It is ideally suited for scenarios such as crowd/riot control, violent suspects, vehicle extraction, cell extractions or returns, and many other types of encounters.

## Features:

- Barrel, projectile velocity, internal and external parts customized for law-enforcement use.
- Target accurate to 60 feet, area saturation with pepper agent to 150 feet.
- Semi-automatic action.
- 160 round hopper capacity
- Works with pepper, training, glass break, marking, or water projectiles.
- Special hopper breach for loading single glass break rounds and following with Pepper for vehicle or other extraction applications.
- Works with Riot Vest for expanded capacity – up to 450 rounds
- Stainless steel hardware up-grade available. Extra enduring, excellent for use in harsh/marine environments.

# PepperBall Custom Carbine Launcher™

## Accessories:

### Carry Case

A carry case is available for the Custom Carbine. It carries speed pod loaders with rounds, extra high pressure air bottles, and more. Designed for the Custom Carbine and provides exceptional protection and portability.

### Crowd Control Vest

The Patriot 450 Riot Kit expands your rounds capacity to 450. The kit includes a four pouch vest with suspenders, 4 speed pod loaders, a 48 cubic inch high pressure air bottle, hose with slide check and quick disconnect. Ideal for situations which may require large employment of projectiles.

### Stainless Steel Upgrade Kit

A special stainless steel upgrade kit is available. Includes all external hardware for launcher and hopper, as well as hopper latch mechanism.
